

# EHS Compliance Calendar

Beta Tester Quick-Start Guide · [greenGPTadvisory.com](https://greenGPTadvisory.com)

## What you're testing

GreenGPT generates a personalised EHS compliance calendar from three inputs: your **industry**, **state jurisdiction**, and **facility hazard profile**. The rules engine maps each obligation to a specific federal or state regulation — no AI guessing, no spreadsheets. You're evaluating the **free tier** today.

## How to use it — 3 steps

**1**

### Select your industry

Pick from: Manufacturing · Oil & Gas · Construction · Healthcare · Warehousing · Food & Beverage →

**2**

### Set jurisdiction & workforce size

State selection is Pro-only in this build. Federal rules are included automatically. Set employee count. →

**3**

### Choose your facility hazard flags

Free tier: Hazmat storage · Air permits (Title V) · Wastewater (NPDES) · Hazwaste generator (RCRA) →

### Then click 'Generate calendar'

→ You'll see your obligations laid out by month. Toggle between Grid view (month-by-month) and Timeline view (chronological list with regulation details and CFR citations).

## What's included in the free tier

| Feature                             | Free (you)   | Pro                                       |
|-------------------------------------|--------------|-------------------------------------------|
| Federal rules engine                | ✓            | ✓                                         |
| Industry types                      | All 6        | All 6                                     |
| State jurisdictions                 | —            | 8 states (CA, TX, NY, IL, PA, OH, FL, NJ) |
| Facility hazard flags               | 4 core flags | All 12 flags                              |
| Grid + Timeline views               | ✓            | ✓                                         |
| Category filtering                  | ✓            | ✓                                         |
| .ics calendar export (Outlook/GCal) | —            | ✓                                         |

|                                     |   |   |
|-------------------------------------|---|---|
| Email reminders (30/60/90 days out) | — | ✓ |
| Document attachments per obligation | — | ✓ |

## What we're asking you to evaluate

### Does the output feel accurate?

The calendar should match the OSHA/EPA obligations you already manage. Flag anything that's wrong, missing, or surprising.

### Is 60-second setup realistic?

The flow is industry → jurisdiction → flags → calendar. Does each step make sense without guidance?

### Would the full calendar (state rules + all flags) be worth it?

The free tier intentionally shows only federal rules. Does what you see suggest the state/Pro tier would add meaningful value?

### How does it compare to how you track deadlines today?

Spreadsheet? Internal system? Nothing formal? We're trying to understand what this replaces.

### Send your feedback

Reply directly to the email that sent you this guide, or use the Contact form at [greenGPTadvisory.com](https://greenGPTadvisory.com). Any reaction is useful — wrong deadlines, confusing UI, missing industries, features you'd pay for.
